Success at Heathrow Leads Avis to Extend Trials for Expert Child Seat Fitting Service

Avis Rent A Car UK has teamed up with specialist child seat fitting service, 'Baby On Board', for a three month trial period at its London Gatwick and Stansted Airport locations, following its success at London Heathrow.

During the trial, customers will be provided with a Chicco baby seat and given a demonstration on how to fit it correctly by specially trained staff. All baby seats are then cleaned and inspected between rentals.

"It is the 25th anniversary since a law was passed making it compulsory for front seat passengers to buckle up. Here at Avis safety for the whole family is of optimum importance.

During the trial, customers will be provided with a Chicco baby seat and given a demonstration on how to fit it correctly by specially trained staff. All baby seats are then cleaned and inspected between rentals.

This new service is now permanently available for rentals leaving and returning to Heathrow and on trial for rentals leaving and returning to London Gatwick and Stansted Airport. Depending on the outcome of the trial, Avis hopes to expand this service to its other UK locations in the future.
